SUMMARY

A 4th-year Computer Science student specializing in Software Engineering. Actively learning front-end web development and experienced in troubleshooting and system configuration. Eager to apply my technical skills and continue developing through real-world experience in web development and IT support.

PROJECTS

QuizSecure, Thesis Project 02/2024 – 05/2025

- Developed an AI-powered online exam platform utilizing MTCNN for real-time facial segmentation and behavior monitoring.
- Applied Python (OpenCV, MediaPipe, FastAPI) and React.js to enhance exam integrity while maintaining user privacy.

Personal Web Portfolio, Self-initiated Project [↗](#)

- Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript.
- Showcases personal projects and technical skills through a clean, modern, and user-friendly interface.

FinWare, Personal Project [↗](#)

- Created as a hands-on learning project to strengthen skills in HTML, CSS, and JavaScript.
- Developed an interactive, responsive webpage that promotes financial security awareness through engaging content and clean design.

AutoTrack, Personal Project [↗](#)

- Created a web application that helps users manage their vehicles and maintenance schedules.
- Built using Flask, MySQL, HTML, and TailwindCSS with a clean and responsive interface.

CERTIFICATES
